

Finding the Median

Terms:

Median - the middle value of a set of numbers

Objective:

You will learn to find the median of a set of numbers.

Steps:

<p>1. Put the values in order.</p>	<p>Number Set: 64, 72, 36, 49, 80</p> <p>In Order: 36, 49, 64, 72, 80</p>
<p>2. Find the middle number.</p>	<p>36, 49, 64, 72, 80</p>
<p>Hint: Count or cross out numbers from both ends and work your way to the middle.</p>	

If there are TWO middle numbers:

<p>1. Put the values in order.</p>	<p>Number Set: 32, 54, 11, 39, 45, 61</p> <p>In Order: 11, 32, 39, 45, 54, 61</p>
<p>2. Find the middle number.</p>	<p>11, 32, 39, 45, 54, 61</p>
<p>3. Find the mean of the two middle numbers.</p>	<p>$39 + 45 = 84$ $84 \div 2 = \mathbf{42}$</p>

Notes and Handout

Name: _____ Period: _____

Unit 3: Graphing and Data Analysis: Median

Math6

Examples:

Ex. 1 Ages of cousins in a family

Set: 15, 13, 11, 9, 17, 21, 29, 25, 30, 28, 33, 34, 17

Set in order: 9, 11, 13, 15, 17, 17, 21, 25, 28, 29, 30, 33, 34

9, 11, 13, 15, 17, 17, 21, 25, 28, 29, 30, 33, 34

Median = 21

Ex. 2 Hourly babysitting rates (in dollars)

Set: 4.00, 3.15, 3.75, 3.30, 3.75, 3.50, 3.25, 3.25, 3.00, 3.60

Set in order: 3.00, 3.15, 3.25, 3.25, 3.30, 3.50, 3.60, 3.75, 3.75, 4.00

~~3.00, 3.15, 3.25, 3.25~~, 3.30, 3.50, ~~3.60, 3.75, 3.75, 4.00~~

Average of the two middle numbers: $3.30 + 3.50 = 6.80 \div 2 = 3.40$

Median = 3.40

Notes and Handout Name: _____ Period: _____

Unit 3: Graphing and Data Analysis: Median

Math6

YOU GOT THIS:

1) Find the **median** of this data set: 5 , 7 , 8 , 4 , 8 , 5 , 6

2) Find the **median** of this data set: 17, 9 , 10, 16, 7 , 16, 18, 17, 14, 9 , 10

3) Find the **median** of this data set: 39, 36, 69, 29, 60, 42, 51, 88, 94, 66
