### Adding Fractions

1)  $\frac{12}{21} + \frac{6}{7} =$

2)  $\frac{1}{16} + \frac{3}{8} =$

3)  $\frac{6}{11} + \frac{7}{55} =$

4)  $\frac{10}{12} + \frac{5}{9} =$

5)  $\frac{15}{27} + \frac{2}{6} =$

6)  $\frac{1}{9} + \frac{1}{27} =$

7)  $\frac{16}{24} + \frac{2}{3} =$

8)  $\frac{3}{40} + \frac{6}{8} =$

9)  $\frac{2}{52} + \frac{1}{4} =$

10)  $\frac{1}{42} + \frac{2}{6} =$

## Adding Fractions

$$1) \quad \frac{12}{21} + \frac{6}{7} = \frac{12}{21} + \frac{18}{21} = \frac{30}{21} = \frac{10}{7} = 1\frac{3}{7}$$

$$2) \quad \frac{1}{16} + \frac{3}{8} = \frac{1}{16} + \frac{6}{16} = \frac{7}{16}$$

$$3) \quad \frac{6}{11} + \frac{7}{55} = \frac{30}{55} + \frac{7}{55} = \frac{37}{55}$$

$$4) \quad \frac{10}{12} + \frac{5}{9} = \frac{30}{36} + \frac{20}{36} = \frac{50}{36} = \frac{25}{18} = 1\frac{7}{18}$$

$$5) \quad \frac{15}{27} + \frac{2}{6} = \frac{30}{54} + \frac{18}{54} = \frac{48}{54} = \frac{8}{9}$$

$$6) \quad \frac{1}{9} + \frac{1}{27} = \frac{3}{27} + \frac{1}{27} = \frac{4}{27}$$

$$7) \quad \frac{16}{24} + \frac{2}{3} = \frac{16}{24} + \frac{16}{24} = \frac{32}{24} = \frac{4}{3} = 1\frac{1}{3}$$

$$8) \quad \frac{3}{40} + \frac{6}{8} = \frac{3}{40} + \frac{30}{40} = \frac{33}{40}$$

$$9) \quad \frac{2}{52} + \frac{1}{4} = \frac{2}{52} + \frac{13}{52} = \frac{15}{52}$$

$$10) \quad \frac{1}{42} + \frac{2}{6} = \frac{1}{42} + \frac{14}{42} = \frac{15}{42} = \frac{5}{14}$$
