### Subtracting Fractions

$$1) \quad \frac{2}{3} - \frac{11}{42} = \frac{28}{42} - \frac{11}{42} = \frac{17}{42}$$

$$2) \quad \frac{13}{28} - \frac{1}{4} = \frac{13}{28} - \frac{7}{28} = \frac{6}{28} = \frac{3}{14}$$

$$3) \quad \frac{7}{8} - \frac{2}{4} = \frac{7}{8} - \frac{4}{8} = \frac{3}{8}$$

$$4) \quad \frac{4}{8} - \frac{1}{16} = \frac{8}{16} - \frac{1}{16} = \frac{7}{16}$$

$$5) \quad \frac{3}{4} - \frac{16}{60} = \frac{45}{60} - \frac{16}{60} = \frac{29}{60}$$

$$6) \quad \frac{6}{7} - \frac{11}{14} = \frac{12}{14} - \frac{11}{14} = \frac{1}{14}$$

$$7) \quad \frac{2}{6} - \frac{1}{9} = \frac{6}{18} - \frac{2}{18} = \frac{4}{18} = \frac{2}{9}$$

$$8) \quad \frac{5}{6} - \frac{7}{48} = \frac{40}{48} - \frac{7}{48} = \frac{33}{48} = \frac{11}{16}$$

$$9) \quad \frac{7}{11} - \frac{2}{55} = \frac{35}{55} - \frac{2}{55} = \frac{33}{55} = \frac{3}{5}$$

$$10) \quad \frac{7}{8} - \frac{16}{56} = \frac{49}{56} - \frac{16}{56} = \frac{33}{56}$$
